Education

RV College of Engineering, Bengaluru 2023 – Present
B.E. in Information Science & Engineering **CGPA: 8.63**
Core Courses: Data Structures & Algorithms, DBMS, Operating Systems, OOP, Cloud Computing.

Vidyanidhi PU College 2021 – 2023
Class 12 (PCMB) **Score: 93%**

Work Experience

Web Development Intern – ImpactBridge March 2026 – Present
Early-stage startup serving 10+ NGO clients across events, donations, and volunteer management.

- Rebuilt the **Angular** frontend from scratch across 4 NGO dashboard modules (Events, Donations, Shop, Volunteers), replacing the legacy UI with a reusable component architecture.
- Implemented a **read-through cache** (30s TTL) and **batched-write pipeline** for analytics, cutting database call volume by **80%** (~20 req/min to ~4 req/min).
- Built **Node.js/Express** REST APIs for all four dashboard modules with full CRUD workflows and structured request validation.

Projects

CloudOps: Cloud Deployment Platform [GitHub](#)
React, TypeScript, Node.js, Express.js, MongoDB, Docker, AWS EC2, AWS ECR, Socket.IO

- Built a deployment platform that clones GitHub repos, builds **Docker** images from user-supplied Dockerfiles, pushes to **AWS ECR**, and **auto-provisions EC2 instances via the AWS SDK**.
- Implemented real-time log streaming by spawning **Node.js child processes** for Docker execution and piping container stdout/stderr to the browser via **Socket.IO**.
- Built a **GitHub webhook handler** with **HMAC-SHA256 signature verification** to trigger automated redeployments; deployment state and run history persisted in **MongoDB**.

Gram Sahayak: Civic Infrastructure Reporting Platform [GitHub](#) | [Live Demo](#)
FastAPI, React, MongoDB, JWT, Leaflet.js, OpenRouter LLMs, AWS S3

- Built a full-stack civic reporting platform with **JWT-based RBAC** for three roles – citizens, contractors, and officials – using **FastAPI, React, and MongoDB**.
- Implemented **Haversine-based geospatial verification** enforcing a **50-meter proximity check** on infrastructure reports to block GPS-spoofed filings.
- Integrated **LLM-based sentiment classification** on grievances; unresolved complaints auto-escalate after **14 days**.

trueProject: Academic Project Management System [GitHub](#) | [Live Demo](#)
FastAPI, React, FAISS, PostgreSQL, Sentence Transformers, OpenRouter LLMs

- Built a multi-tenant academic project portal with **JWT-based RBAC** for Students, Faculty, and Administrators using **FastAPI and React**.
- Engineered a semantic search layer using **Sentence Transformers** and **FAISS** to index project titles and abstracts, enabling concept-similarity queries across the repository.
- Integrated **LLMs** to generate evaluation summaries and automate the initial faculty review workflow.

Technical Skills

Languages: C++, Python, JavaScript, TypeScript, SQL
Frontend: React.js, HTML, CSS, Tailwind CSS
Backend: Node.js, Express.js, FastAPI
Databases: MongoDB, Firebase, FAISS
Cloud & Infra: AWS (EC2, ECR, S3), Docker, Git/GitHub, Linux
Other: Socket.IO, REST APIs, JWT, Postman

Achievements & Certifications

- LeetCode:** 185+ problems solved – arrays, graphs, and dynamic programming.
- National Finalist, Hackfest (NMAMIT):** Placed in **Top 5** out of 60+ teams in a 36-hour national hackathon.
- Big Data Computing (NPTEL):** Elite + **Gold Medal (Top 5% Topper)** with **91%** score | [Certificate](#)
- Data Science for Engineers (NPTEL):** Elite + **Silver Medal** with **81%** score | [Certificate](#)
- GCP Cloud Arcade:** Completed Google Cloud Skills Boost — [Certificate](#)
